

Subject Code Change Key

For students enrolled Fall 2009 or later at WVU Tech, for courses taken prior to Fall 2009 some subject codes were changed in the database from which transcripts are generated. The courses are the same courses by title and course number; however, there is a T preceding the course number. The following is a list of the subject codes that may be represented differently, and what their former code was in some catalogs published Fall 2008 or earlier.
